In this issue:

Welcome to our fifth Mace community update for the new Spurs Stadium Project.

This publication aims to keep you involved and informed of this project and the works planned over the coming months.

Headlines in brief:

- Site progress
- School volunteering
- Support for local businesses
- Drop in meeting
- Employment and training opportunities
- Who to contact
- Site operating hours

Site progress

The first phase of demolition is now complete, with the North Stand Truss having been removed in the week of 19th June. We are very grateful to our neighbours for their patience during demolition; our aim has been to complete this phase of construction as quickly as possible with the intention of limiting the overall disruption.

Commencement of the South stand demolition is underway. Park Lane is intended to be opened from 23rd July whilst demolition continues within the site.

The ‘compression ring’ for the roof structure is now being installed on the top of the stadium’s northern steelwork. The ring will be the highest part of the building and is an innovative design for constructing circular or oval roofs.

A concrete, glass and metal panel façade is being installed from North to South, moving along both sides. On the North side there are Spur’s cockerel emblems cast into the concrete panels, these are an early indication of what parts of the façade will look like. Façade works will be ongoing until late in the programme.

Internal fit-out of the stadium has commenced with installation of walls, floors and early electrical works.

Piling in Phase Two (the Southern area of the stadium) commenced in the week of 19th June and is expected to continue until September.

We are using the continuous flight auger (CFA) piling method, which is considered to be the least disruptive. In total we will pour over 1,000 piles in the southern area; the deepest pile will be 27 meters long. There will be an increase in the number of concrete mixing vehicles coming to the site in order to supply the volume of concrete required. As with the process during demolition, we are aiming to use 44 White Hart Lane as a holding bay for wagons to limit the queuing of vehicles around the site and to reduce the disruption to neighbours.

Who to contact

Other related news

On Monday and Tuesday 19th and 20th June Mace visited St Francis De Sale School to deliver workshops on engineering and construction. Our goal was to inspire the children about working in construction and to do this we gave them the chance to try being architects, engineers, construction and project managers. Nearly 250 students from Years 4 and 5 took part in group contests to build a structure with support from Mace volunteers.

Business Support

Tottenham Traders Partnership is a local association of businesses. It can offer advice and guidance to businesses on increasing their profile and receiving support as an independent business. Please see the flyer here for further information on support available.

Mace will host a drop-in meeting for anyone wanting to ask questions relating to the construction of the development. The session will be held at Mace’s project office on Worcester Avenue on Thursday 27th July from 4.30-7pm. Members of Mace’s construction team will be on hand, along with our Community Engagement manager.

Employment and training opportunities

To find out about the employment and training opportunities available through the stadium redevelopment, please contact foundation@tottenhamhotspur.com or visit www.tottenhamhotspur.com/foundation/what-we-do/employment-and-skills
